

Using your debit card to pay in shops.

Tap or insert card.

You can 'tap' your card on the top of the EFTPOS terminal or insert your card into the bottom. If inserting, make sure your card goes all the way in.

Select account if prompted.

If you have inserted your card, you will need to select the account you want to transact on i.e. 'Savings' or 'Cheque'. If you 'tap' your card, you do not need to do this.

Enter your PIN.

You may be prompted to enter your card PIN (not needed for contactless payments of less than \$100). Type this on the keypad then hit 'Enter'.

For security reasons you should never write down your PIN or share it with anyone else.

Remove your card.

Ensure your transaction was successful. If you have inserted your card, remove it from the bottom of the EFTPOS terminal.
