

## BASEL III PILLAR 3

CAPITAL ADEQUACY AND RISKS  
DISCLOSURES AS AT 31 MARCH 2015

**Commonwealth**Bank

## 1 Scope of Application

The Commonwealth Bank of Australia (the Group) is an Authorised Deposit-taking Institution (ADI) regulated by the Australian Prudential Regulation Authority (APRA) under the authority of the Banking Act 1959.

This document is prepared in accordance with Board approved policy and quarterly reporting requirements set out in APRA's prudential standard APS 330 "Public Disclosure". It presents information on the Group's capital adequacy and Risk Weighted Asset (RWA) calculations for credit risk including securitisation exposures, market risk, Interest Rate Risk in the Banking Book (IRRBB) and operational risk.

The Group is required to report its assessment of capital adequacy on a Level 2 basis. Level 2 is defined as the consolidated banking group excluding the insurance, funds management businesses and entities through which securitisation of Group assets are conducted.

The Group is predominantly accredited to use the Advanced Internal Ratings Based approach (AIRB) for credit risk and Advanced Measurement Approach (AMA) for operational risk. The Group is also required to assess its traded market risk and IRRBB requirement under Pillar 1 of the Basel capital framework.

This document is unaudited, however, it has been prepared consistent with information that has been subject to review by an external auditor and published elsewhere or has been supplied to APRA.

The Group's capital adequacy and risk disclosures for the year ended 30 June 2014 are available on the Group's corporate website [www.commbank.com.au/shareholders](http://www.commbank.com.au/shareholders).

## 2 Group Capital Ratios

The Group's Basel III Common Equity Tier 1 (CET1) APRA ratio was 8.7% as at 31 March 2015, an increase of 20 basis points on December 2014 after excluding the impact of the 2015 interim dividend (which included the issuance of shares in respect of the Dividend Reinvestment Plan). The Group's Basel III Internationally Comparable CET1 ratio as at 31 March 2015 was 12.7%.

The major differences between the Basel III APRA and the Internationally Comparable ratios are:

- APRA requires a full deduction to be taken for equity investments and deferred tax assets, whilst on an Internationally Comparable basis, such items are concessionally risk weighted if they fall below prescribed thresholds;
- APRA requires capital to be held for IRRBB with no similar requirement on an Internationally Comparable basis;
- APRA requires a minimum Loss Given Default (LGD) floor of 20% to be applied to residential mortgages, compared with the Basel Committee floor of 10%. The Internationally Comparable basis has applied an actual LGD level of 15%;
- The Internationally Comparable ratio removes the more conservative risk weighting treatment of specialised lending exposures imposed by APRA; and
- The Internationally Comparable ratio removes conservative risk modelling parameters and national discretions imposed by APRA, with respect to corporate exposures, which are not evident in most offshore jurisdictions.

### Capital Initiatives

The following significant capital initiatives were undertaken during the March 2015 quarter:

- The DRP in respect of the 2015 interim dividend was satisfied by the allocation of approximately \$574 million of ordinary shares, representing a participation rate of 17.9%; and

In March 2015 the Group issued 1 billion Chinese Renminbi (AUD 0.2 billion) subordinated notes that are Basel III compliant Tier 2 capital.

In April 2015 the Group issued 1.25 billion euro (AUD 1.7 billion) subordinated notes that are Basel III compliant Tier 2 Capital.

(1) The calculation of the March 2015 and December 2014 ratios are in accordance with the Internationally Comparable methodology detailed in the August 2014 PwC Australia report commissioned by the ABA.

### 3 Risk Weighted Assets

RWA are calculated in accordance with the AIRB approach for the majority of the Group's credit risk exposures.

Internal assessment and supervisory formula approaches are used where relevant for non-rated securitisation exposures

and the ratings-based approach is used for securitisation exposures rated by External Credit Assessment Institutions (ECAI).

(1) APRA requires RWA amounts derived from Internal Ratings Based (IRB) risk weight functions to be multiplied by a factor of 1.06.

#### Risk Weighted Assets

Total RWA increased by \$12.5 billion or 3.5% on the prior quarter to \$365.6 billion.

#### Credit Risk Exposure and RWA

Credit risk RWA increased by \$6.4 billion or 2.1% to \$318.0 billion. Growth (mostly in retail, sovereign, corporate and specialised lending exposures) was partly offset by net improvement in overall portfolio credit quality.

#### Traded Market Risk RWA

Traded market risk RWA increased by \$0.1 billion or 1.9% to \$6.6 billion.

#### Interest Rate Risk in the Banking Book (IRRBB) RWA

IRRBB RWA increased by \$4.4 billion to \$9.2 billion during the quarter as a result of balance sheet growth, treasury risk management activities and higher modelled volatility of interest rates.

#### Operational Risk RWA

Operational Risk RWA increased by \$1.6 billion or 5.2% to \$31.7 billion. The increase reflects the continued growth of the Group and changes to the business environment.

#### 4 Credit Risk Exposure

The following tables detail credit risk exposures subject to Advanced IRB and Standardised approaches.

## 7 Glossary

<b>Term</b>	<b>Definition</b>
Additional Tier 1 Capital	Additional Tier 1 Capital is a Basel III concept and consists of high quality capital that provides a permanent and unrestricted commitment of funds, is freely available to absorb losses, ranks behind the claims of depositors and other more senior creditors in the event of a wind-up, and provides for fully discretionary capital distributions.
Australian Accounting Standards	The Australian Accounting Standards issued by the Australian Accounting Standards Board.
Authorised Deposit-taking Institution (ADI)	Includes banks, building societies and credit unions which are authorised by APRA to take deposits from customers.
Advanced Internal Ratings Based (AIRB) Approach	Used to measure credit risk in accordance with the Group's Basel III accreditation that allows the Group to use internal estimates of PD, LGD and EAD for the purposes of calculating regulatory capital.
Advanced Measurement Approach (AMA)	Used to measure operational risk in accordance with the Group's Basel III accreditation that allows the Group to use its own internal model for the purposes of calculating regulatory capital.
Australian Prudential Regulation Authority (APRA)	The regulator of banks, insurance companies and superannuation funds, credit unions, building societies and friendly societies in Australia.
ADI Prudential Standards (APS)	APRA's ADI Prudential Standards. For more information, refer to the APRA web site.
ASB	ASB Bank Limited – a subsidiary of the Commonwealth Bank of Australia directly regulated by the Reserve Bank of New Zealand.
Bank	Basel asset class – includes claims on ADIs and overseas banks.
Basel II	Refers to the Basel Committee on Banking Supervision's Revised Framework for International Convergence of Capital Measurement and Capital Standards issued in June 2006 and as subsequently amended.
Basel 2.5	Refers to the Basel II framework revised (2009) to include additional requirements such as the Incremental Risk Charge (IRC), Stressed VaR (SVaR), the treatment of securitisation exposures and the Comprehensive Risk Measure (CRM) for certain correlation trading activities.
Basel III	Refers to the Basel Committee on Banking Supervision's framework for more resilient banks and banking systems issued December 2010 (revised June 2011) and Capital requirements for bank exposures to central counterparties (July 2012).
CBA	Commonwealth Bank of Australia – the head entity of the Group.
Central counterparty (CCP)	A clearing house that interposes itself between counterparties to contracts traded in one or more financial markets, thereby ensuring the future performance of open contracts.
Common Equity Tier 1 (CET1) Capital	The highest quality of capital available to the Group reflecting the permanent and unrestricted commitment of funds that are freely available to absorb losses. It comprises ordinary share capital, retained earnings and reserves less prescribed deductions.
Collective Provision	All loans and receivables that do not have an individually assessed provision are assessed collectively for impairment. The collective provision is maintained to reduce the carrying value of the portfolio of loans to their estimated recoverable amounts. These provisions are as reported in the Group's Financial Statements in accordance with the Australian Accounting Standards (AASB 139 "Financial Instruments: Recognition and Measurement").
Corporate	Basel asset class – includes commercial credit risk where annual revenues exceed \$50 million.

## 7 Glossary (continued)

<b>Term</b>	<b>Definition</b>
Credit Valuation Adjustment (CVA) Risk	The risk of mark-to-market losses related to deterioration in the credit quality of a derivative counterparty.
Exposure at Default (EAD)	The extent to which a bank may be exposed upon default of an obligor.
External Credit Assessment Institution (ECAI)	For example Moody's, Standard & Poor's or Fitch.
Extended Licenced Entity (ELE)	APRA may deem an entity of an ADI to be part of the ADI itself for the purposes of measuring the ADIs exposures to related entities.
General Reserve for Credit Losses (GRCL)	APS 220 requires the Group to establish a reserve that covers credit losses prudently estimated, but not certain to arise, over the full life of all individual facilities making up the business of the ADI. Most of the Group's collective provisions are included in the General Reserve for Credit Losses. An excess of required General Reserve for Credit Losses over the Group's collective provisions is recognised as a deduction from CET1 on an after tax basis.
Individual Provisions	Provisions made against individual facilities in the credit-rated managed segment where there is objective evidence of impairment and full recovery of principal and interest is considered doubtful. These provisions are as reported in the Group's Financial Statements in accordance with the Australian Accounting Standards (AASB 139 "Financial Instruments: Recognition and Measurement"). Also known as individually assessed provisions or IAP.
Interest Rate Risk in the Banking Book (IRRBB)	The risk that the Bank's profit derived from Net Interest Income (interest earned less interest paid), in current and future periods, is adversely impacted from changes in interest rates. This is measured from two perspectives; firstly by quantifying the change in the net present value of the balance sheet's future earnings potential and secondly, as the anticipated change to the Net Interest Income earned over 12 months. The APS117 IRRBB regulatory capital requirement is calculated using the net present value approach.
Level 1	Represents the ADI and each entity of the ADI that has been approved as an extended licence entity by APRA.
Level 2	The level at which the Group reports its capital adequacy to APRA being the consolidated banking group comprising the ADI and all of its subsidiary entities other than the insurance and funds management entities and those entities through which securitisation of Group assets is conducted. This is the basis on which this report has been produced.
Level 3	The conglomerate group including the Group's insurance and wealth management business.
Loss Given Default (LGD)	The fraction of EAD that is not expected to be recovered following default.
Other Assets	Basel asset class – primarily includes Cash, Investments in Related Entities, Fixed Assets and Margin Lending.
Other Retail	Basel asset class – primarily includes retail credit exposures not otherwise classed as a residential mortgage, SME retail or a qualifying revolving retail asset.
Prudential Capital Requirement (PCR)	Represents the minimum capital requirement set by APRA that an ADI must maintain across CET1, Tier 1 Capital and Total Capital.
Probability of Default (PD)	The likelihood that a debtor fails to meet an obligation or contractual commitment.
Qualifying Revolving Retail (QRR)	Basel asset class – represents revolving exposures to individuals less than \$0.1m, unsecured and unconditionally cancellable by the Group. Only Australian retail credit cards qualify for this AIRB asset class.
Residential Mortgage	Basel asset class – retail exposures that are secured by residential mortgage property.
